

Powering progress with premium solutions

We align industry-leading products with strategic insight to deliver outcomes that last.

Our Brands

Intelligent thermal utilities solutions that save time, money, and energy for your industry from a global leader in energy management and enjoyable experiences. Delivering system solutions that improve utility performance, lower energy consumption, and reduce environmental emissions.

Gas detection for ventilation control; automatic water strainers; wastewater treatment; electric hot water and steam boilers.

Check-All Valve offers dependable, versatile, and cost-effective check valves, standard or custom, for nearly any application.

CSI provides thermal maintenance systems for heating and cooling of liquid/vapor processes.

Global filtration leader advancing technologies for better lives and cleaner environments.

Specializes in designing and manufacturing heat exchangers, delivering innovative thermal solutions.

Manufacture of flexible metal piping products for thermal, seismic, and vibration control.

Quality tube bundles, heat exchangers, coils, tanks, and other heat transfer equipment.

Heat recovery systems, blowoff tanks & blowdown separators, boiler water sample coolers, and boiler chemical treatment skids.

Heat transfer, refrigeration, and air handling equipment for industrial, commercial, and utility markets.

Engineered blanket insulation solutions for a comprehensive approach to thermal and acoustic control.

Hydronic specialties include pumps, heat exchangers, packaged systems, water heaters, vents, and tanks.

Designs and manufactures high-performance quadruple offset butterfly valves for demanding industrial applications.

Training that empowers

Hands-on Training

Dive into real-world systems with instructor-led sessions. From steam basics to advanced energy-saving strategies, gain practical skills that translate directly to improved performance.

Armstrong University

Access a world-class digital learning platform through Armstrong International. Explore self-paced courses on steam, hot water, flow measurement, and more.

Webinars

Free monthly virtual sessions that deliver focused, actionable insights for a variety of topics. Watch live or on your own time with on-demand recordings.

Custom On-site Training

Tailored sessions designed around your systems and goals. Choose from a range of topics, from basic concepts to advanced applications, delivered where and how you need them.

Services that deliver

Air Leak Survey

Maximize performance and safety by optimizing your compressed air system.

Boiler Balance Studies

We assess your boiler's performance to uncover ways to boost efficiency, cut costs, and strengthen reliability.

Boiler Rentals

Provide steam to remote job sites and ensure uninterrupted operations during boiler failures or planned maintenance with boiler rentals.

Humidification Audits

Slash energy costs, boost efficiency, and optimize systems for maximum uptime and productivity.

Thermal System Audits & Mapping Studies

We map thermal performance across your facility to identify energy losses, prioritize improvements, and unlock long-term savings.

Steam Trap Surveys

Uncover hidden energy waste, maximize power consumption efficiency, and keep your system operating efficiently and safely.

Your progress has a local partner

Wherever you are, Merlo Energy is there — with the people, tools, and expertise to move your business forward in real time. Because partnership means showing up and delivering when it matters most.
